

Case Study - School District 36 Surrey

This case study showcases the design and implementation of new learning spaces at School District 36 in Surrey, Canada.

Project Overview

The SD36 project was the first of its kind in British Columbia and was treated with care as a top priority throughout the duration.

Assembly began in early April to meet the September start-up and was open for touring by July.

Their Objective

The project, a new concept for the community, aimed to bring Flexible Learning to SD36. Its goal was to create an environment that fostered learning and growth for all types of students using these spaces.

Flexible Work Environment

The design leans on flexible and dynamic furniture solutions that allow mobility in the space, encouraging all forms of learning and activities.

Fostering Community

The mobile furniture allows students to be easily placed together in a way that encourages group work, team building, and a sense of unity.

Develop Independence

The layout can be easily adjusted so each person has their own space to work independently and build self-reliance

Encourage Active Engagement

Flexible workspaces encourage hands-on learning. Mobile furniture makes it easy to switch between different teaching and learning methods.

Design that Empowers

- The right furniture and layout empower diverse learning activities.
- Strategic furniture choices can boost student independence and teamwork.

Encouraging Student Development

- The furniture encourages students to work in groups, supporting collaboration and teamwork.
- Outfitting classrooms and labs with adaptable furniture also promotes independence.

Promoting Adaptability

- It is essential that spaces can adapt to the changing needs of an educational environment.
- At Artcobell, we provide furniture that meets those ever-evolving needs.

Artcobell's Unwavering Commitment

Artcobell is committed to providing high-quality furniture tailored to meet the unique needs of teachers and students in schools everywhere. Our products are manufactured in the USA, and we actively support local communities. Our furniture is rigorously tested to meet or exceed industry standards and has been certified by SCS Indoor Advantage Gold IAQ. For your comfort, we offer a 12-year warranty against any manufacturing defects.

Beyond manufacturing, we commit to a larger objective—fostering sustainable business practices. Our commitment to responsibility is demonstrated through our focus on Responsible Product Design, Responsible Sourcing, Responsible Manufacturing, and maintaining a Responsible Workplace. This program shows our dedication to our customers, our community, our employees, and the world we live in. Our unique combination of quality, locality, and responsibility sets Artcobell apart and defines our mission.

Seating that Promotes Learning

Artcobell offers a range of seating tailored to the dynamic needs of different classrooms. From the Cantilever Chair to the MOV Stool, each piece combines ergonomic design with durability, ensuring comfort throughout the learning day. Our four-legged options and task chairs are built to foster engagement and mobility, accommodating the diverse needs of students and educators alike.

Versatile Workspace Solutions

With various choices available, Artcobell's work surfaces cater to varying educational activities. Our designs, including sit-to-stand desks and mobile cubbies, prioritize flexibility and adaptability, supporting educators in creating multifunctional learning environments.

Interactive Learning Spaces

Artcobell's innovative furniture pieces, like the Trek and Wanderer series, are designed to promote collaboration and active learning among students. Soft seating options such as sofas, wedges, and crescent shapes encourage comfortable, engaging group discussions and teamwork, reflecting a modern approach to classroom design.

Storage and Organization

Artcobell provides a wide range of storage solutions to complement the learning environment, including Maker Space Cabinets and Mobile Shelves. These storage options are designed for efficiency and accessibility, keeping materials organized and readily available to students and teachers, in turn enhancing the overall functionality of the classroom.
