

Trends in Teaching + Learning

COURSE TITLE:

Trends in Teaching & Learning (AIA-ABC10425)

COURSE DESCRIPTION:

The where, what and how to educate students is under review around the world. Research and data are asking if we are measuring the right things, are we looking at what really makes a difference and how it all connects to impact student achievement. The pressure is on for design professionals to create environments that serve as tools for teachers rather than decorative spaces. This course explores how creating different learning environments (personalized, active, collaborative and flexible) can support student achievement and engagement and how these environments are influenced by design research and innovative furnishings.

LEARNING OBJECTIVES:

- » Identify how different aspects of design, learning environments and the furnishings for classrooms can influence student engagement.
- » Explain the three factors of design that impacts student achievement.
- » Discuss four different learning environments that promote student engagement
- » Recognize how classroom furnishings support flexible, collaborative, personalized and active learning environments.

COURSE CREDIT:

- » 1.0 CEU

CEU TYPE:

- » Project Planning & Design
